Applicant's election of the invention I claims 1-8, 18 and 19 without traverse has been acknowledged.

Claims 9-17, 20-24 are withdrawn from consideration as drawn to the non-elected invention.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(a) as being clearly anticipated by Brown et al (US 2001/0029994 A1) figure 11. Brown et al show all the structure of the device as recited by the claims.

Claims 18 and 19 are rejected under 35 U.S.C. 102(b) as clearly anticipated by Kleyn (US 5,547,096). Claims 18 and 19 are product-by-process claims. The courts have been holding for quite some time that “—in spite of the fact that a product-by-process claims may recite only process limitations, it is the product which is covered by the claim and not the recited process steps” (In re Hughes, 182 USPQ 106) . The only structure that is claimed in claims 18 and 19 is a vehicle fuel tank.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-8 are rejected under 35 U.S.C. 103(a) as being unpatentable Brown et al. Brown et al shows all the structures of the device as recited by the claims except the claimed material. It would have been obvious to make the fitting out of any desired well known material.

Any inquiry concerning this office action will be directed to Examiner Joseph Moy, (703) 308-1145. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging faxing of responses in Office Actions directly into the group at (703) 305-3579 or (703) 305-3580. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by Applicants who authorize charges to a USPTO deposit account. Please identify the examiner and the art unit at the top of your cover sheet.

If in receiving this Office Action it is apparent to applicant that certain documents are missing e.g. copies of references cited, from PTO-1449, form PTO-892., etc requests for copies of such papers should be directed to Errica Bembry at (703)306-4005.
